

Make Money from climate change

Who are we ? & What do we do ?

ISIS Security Ltd

Protecting your family, giving
peace of mind

We live in Great Britain,

it **IS** going to rain !

Sometimes . . . the rain does not **STOP**

Flooding creates untold misery to our personal and business lives;

Through the lose of:

prized irreplaceable possessions
(photographs, letters and cards from loved ones, books etc)

Or valuable electronic equipment, data, customer invoices and
book keeping records

You are on the beach in sunny some where . . .

your house is flooded ! ! !

Back at home . . .

So if you had been pre
warned . . .

If only you'd known . . .

**what would you
have saved ?**

What 'treasures' do you wish you had saved ?

What would you pay to get them back ?

Who might have received the
FIRST
Early warning of flooding ?

Perhaps . . .

The Canute System cannot hold back 'the tide',
but can give you warning of
rising water and/or Sewerage.

This can be in a one off warning,
or delivered in a graduated manner i.e.

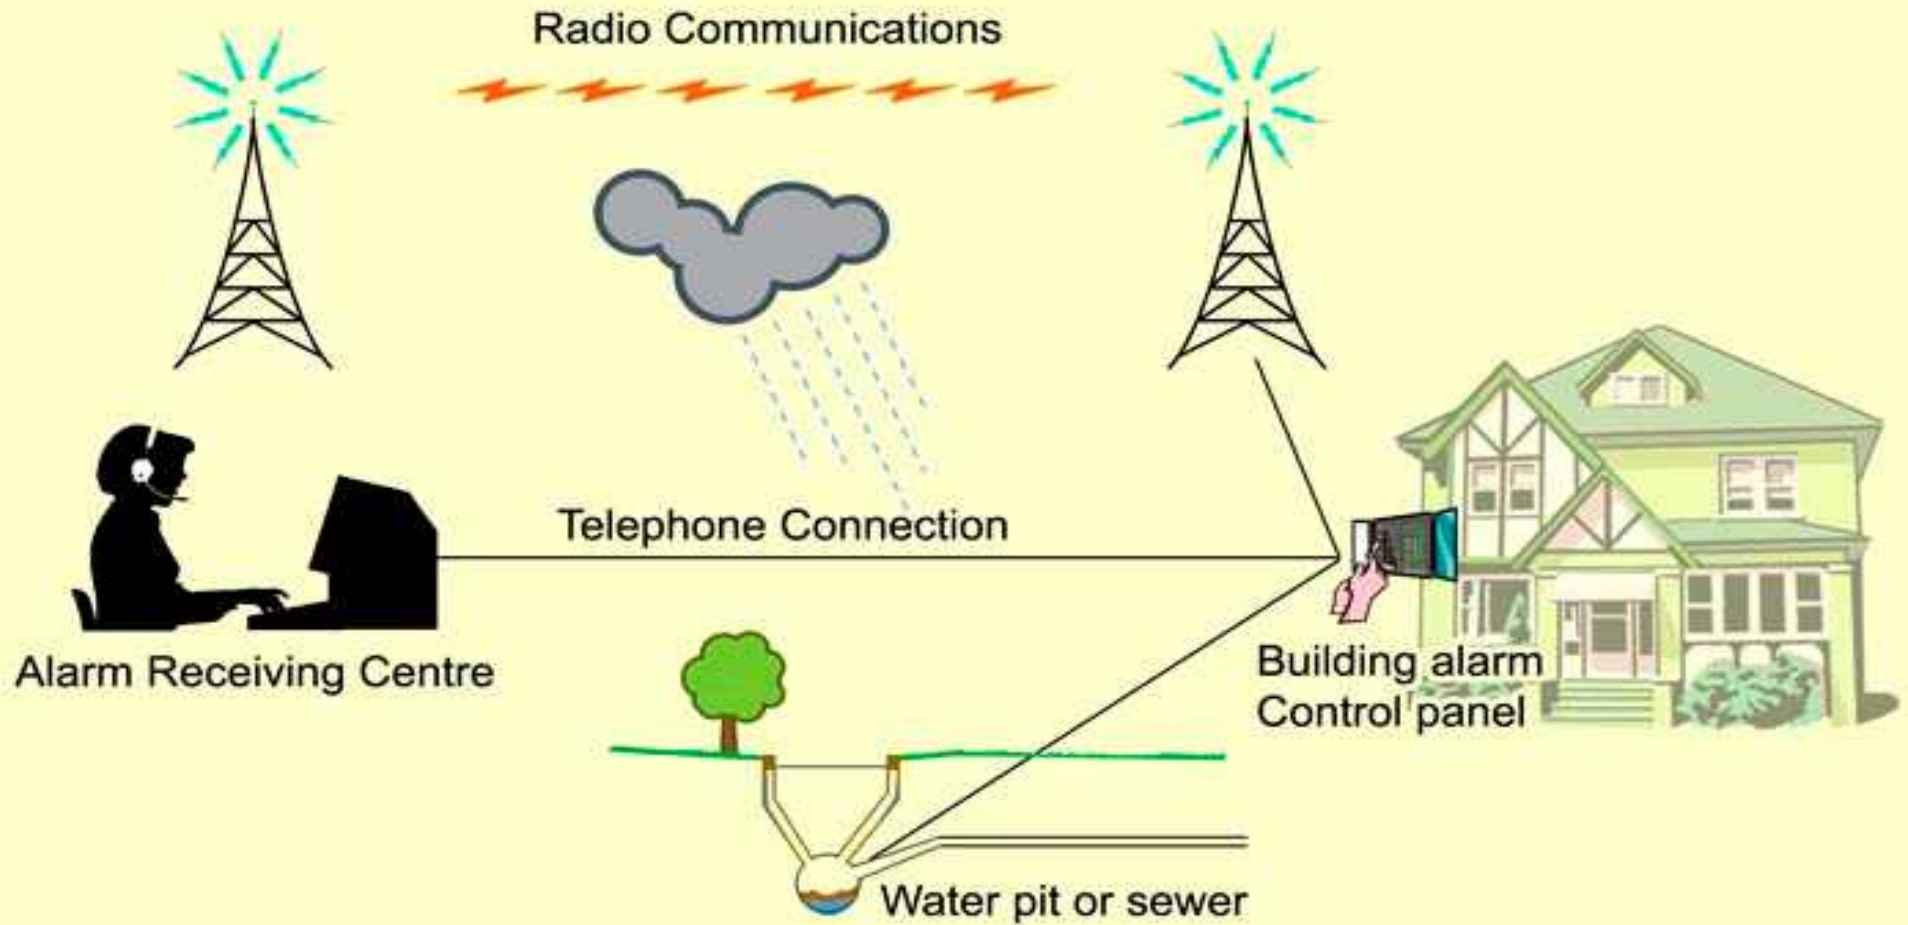

1st call warning of water above its normal level,

2nd call - the water is continuing to **Rise**,

3rd it is virtually . . . ***TOO late !***

The CANUTESYSTEMS

PROVIDING EARLY WARNING

A typical domestic sewer with a Canute System fitted

This being a single call as the situation is
unlikely to resolve it's self

Graduated
flood
early
warning
